

Resource Placement

The resource you need. When you need.

WE PROVIDE

SKILLED PROFESSIONAL RESOURCE for Software Development Projects

Resource Placement

Discover a better way of managing IT resources, reduce risk and save time with our resource placement services. Free up time to focus on business and projects ensuring the best possible and cost optimized delivery from resources

Our VALUES

Integrity

We demonstrate the highest standards of integrity in all of our actions

Collaboration

We work collaboratively together, across boundaries, to meet the needs of customers

Flexibility

We are flexible to build a team with a variety of different backgrounds, which meets customer requirements

Quality

We provide quality products and services to our customer

SERVICE Model

Onsite Resource in Netherlands

This model is particularly suitable if you need frequent face-to-face interaction with your team members. Resource can be located in our NL office or your office premises

Offsite Resource in Bangladesh

Offsite developer will be located in our Bangladesh office. We will provide all required logistics. Resource will report and work under your project manager. Most cost effective solution for software development project. Suitable for small to medium size project

Hybrid Resource Model

Hybrid model consists of both onsite and offsite resource. You will have onsite project manager and offsite developers. Onsite NL Project managers interact with both NL customer and business analyst. They also manages day-to-day activity with your offsite development team for core development

BYOT (Build Your Own Team)

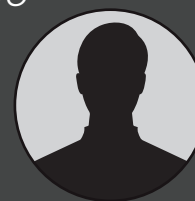

You build your own team mixing both onsite and offsite based to meet your specific model and requirement. We support you with resource and logistics

Technology Coverage

.NET Core, Python, C#, PostgreSQL, Microsoft SQL Server, Angular, PHP, HTML5, Bootstrap, JavaScript, Vue.js, AJAX, Oracle, R etc

The resource pool in Bangladesh really is amazing. Recently we needed a new Mechanical Engineer. Within one week, we had over 450 applications from which we short listed 15. Being impressed on the interviews we even decided to add two.

Director

Why Hire Resource from HawarIT?

Cost Efficiency

Increase profitability and measurable ROI. Reduce overhead and improve cash flow. We provide European quality assurance with Asian resource at optimal cost. This allows you to focus more on results at reduced investment costs. Save on infrastructure and technology.

Profit From Our Knowledge

Being a 20 years old IT company, we are familiar with all phases of software development and experienced at recruiting the right resource with right level of skill to meet your need. Profit from our knowledge and experience.

Faster and Better Services

Our flexible model allows you to focus on what matters. It decreases the lead-time. You can almost work around the clock in terms of time zones and holidays. We provide a level of continuity to our customer while reducing the risk over a short period of time.

Whether you need one person or an entire project team, and whether your needs are short-term or full-time, we provide quality skilled professionals at optimum cost

MAKE IT HAPPEN OFFSITE RESOURCE

EASY 4-STEPS METHODOLOGY

1

Needs Analysis

Our experienced industry Experts assess the customer need, the project background and the appropriate skill set and resource required

2

Screening

We target local market for suitable resource for the best possible candidates. Hand selected them to evaluate their professional qualifications and overall fit for the position

3

Evaluation

Screened potential resources are then jointly (or by the customer) interviewed, assessed and evaluated. We do the reference check and background check for the shortlisted resources

4

Project Kickoff

Selected resources are engaged into customer projects after signing contracts. We keep providing all required logistics. You can even have a trial period (pay only if satisfied), ensuring they're the right fit
